

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

JULY 13, 2010

EXPANDED WATER STUDY REPORT

On October 10, 2000, the Los Angeles County Board of Supervisors instructed the Environmental Toxicology Laboratory of the Agricultural Commission/Weights and Measures Department to conduct an expanded study to all the small well water facilities under the jurisdiction of the Los Angeles County Department of Public Health and all County agencies for the presence of total chromium, lead, and arsenic.

This report presents an opportunity for the County to review the analytical results and compare them to the historical data reported to the Department at the sampling locations.

I, THEREFORE, MOVE that the Board of Supervisors direct the Environmental Toxicology Laboratory of the Agricultural Commission/Weights and Measures to repeat the work that was done in 2000 to indentify trends and changes in the water chemical levels from 2000-2010 and report back to the Board in 60 days.
